I. SHORT INTRO ABOUT THE AUTHOR

My name is Darwin Jayme. I started online since 8 years ago. I consider the past eight years of my life to be the most challenging ones. It's been eight years ago that my brother introduced me to making money from using only a computer and our internet connection. I always look up to my brother and when he shared to me that he was able to start earning a living from home on the internet, I told myself that I can do the same as well. And, with his guidance on my first few months and years of starting my venture on the internet money-making industry, I was able to go straight to the path towards success. With that I am very thankful! I have known and have read posts and blogs from all over the internet pages of unhappy people that have been lied to and ripped off by the programs and internet business opportunities that promises everything but delivered less or even nothing at all. I am not saying that never in my internet marketing years that I'd fallen to the "internet" scam traps. There are a lot of them – a report shows that at least 90% of "money-making" programs on the internet are scam. It's hard to stay away from them especially if you are in the stages of "experimenting" by yourself.

While we can hardly stay away from these "bad" or scam programs, especially if we are just new to internet money-making industry, we can still avoid them when we learn the real essence of making money on the internet.

"DECEPTION" is the most common, yet hidden, name or term of the game on this industry. If you start or join an online business opportunity only because you are deceived wrongly by hyped up promises, chances are you will end up complaining when you feel that you are not getting what you have been promised. While this industry have made a lot of dollar millionaires in just few years, a lot of lies have scattered about it from people who are very frustrated to attract people to "buy their secrets" and "subscribed to their paid programs" for them to rake in huge amount of cash!

With this, I've decided to make my compilations of biggest and common lies of the Internet Money-Making industry so that you will be aware of it and somehow, someday, it will help you earn and/or hundreds or even thousands of dollars, huge amount of time and efforts that you are destined to waste if you are not aware of these lies.

II. ABOUT THIS EXPOSÉ – BENEFITS OF READING THIS REPORT

On the next article below, I've listed the top 5 lies that I have discovered and encountered on the internet money-making industry everyday. These 5 biggest and common lies that anyone who tries to make money on the internet may encounter, can cause you a lot of dollars if you will be wrongly deceived by these lies.

Once you believed in these lies and put in your heart and mind that they are for real and that you will truly make money believing them, then you will start spending out money on every recommendations of “buy this,” “get this,” “buy that” in order to start making money on the internet. You will realize later that you have already bought a lot, spend thousands of dollars, months or even years of time, but are earning very less (if you are lucky) or even nothing at all.

III. THE BIGGEST & COMMON LIES LIST

A. There are No Secrets.

Gurus keep sharing and selling their so-called "secrets," but the truth is, there are No Secrets - Everything is laid on the internet, you just have to find it. The challenge is that it usually takes time before you find what exactly is that you're looking for. And one of the many reasons why most people fail is that they usually give up before finding what they're looking for.

B. Making Money on the Internet is NOT Easy.

“Make Money Very Easily!” “Earn Hundreds or Thousands of Dollars From Home Without Lifting a Finger!” – I’ve seen these lines and lies over and over again for products, services, programs, or business opportunities that are being promoted all over the internet pages, but the truth is, Internet Money-Making is NOT that easy! It's usually hard especially if you are just starting up. If you will accept this fact, and will still want to pursue an internet money-making career despite all the possible hardships and trials that you will be going through, there's a good chance that you will succeed especially if you won't give up.

C. “Earning without Recruiting,” “Earning without Joining,” and the like-pitched programs Exist, BUT, there are BIG “BUTs” that you must know...

- a. **There's only a few** of them that truly live by their words; that is, truly offers real income to members by "just joining" – without recruiting!
- b. While these few programs truly let members earn by just joining, **most of the times, the so-called "FREE Money" does NOT last long.** Most of the times, this "Free Money" or earnings can't even cover the cost of what you have to pay to join these few programs. They termed it right: "Earning" and Not "Profiting!" These are two very different terms relating to monetary achievement. Earning is the general term for the return (usually monetary) that you get from anything that you are involved with (usually business). Profit is a specific term for the NET return that you get from the business that you are involved with.

$$\text{Profit} = \text{Earnings} - (\text{Capital} + \text{Expenses})$$

If your Earnings are less than the sum of all your capital investments and other expenses, then you are not yet in profits even if you are already truly earning without doing anything other than joining.

- c. With these "FREE Money" programs, **the time it takes for you to earn, how much you want to earn, and when you want to earn it certainly depends on the performances of the program that you join – which includes the performances of each of its members.** It is NOT in your control. All you have to do is wait - yes, just wait. Very simple. However, waiting can take very, very long. And sometimes, members might wait up to eternity to earn their first \$1.
- d. You can take advantage of these few programs that truly delivers the "Earning By Just Joining", "Earning Without Recruiting" and the like sales pitches by:
 1. **Joining them early.** If it's a matrix-based compensation plan wherein the "free money" earnings usually depends on spillovers and spillunders from upline members or any hybrid matrix-based compensation plans (*if you won't recruit, your earnings will still depend on the efforts of others which are not in your control*), those who are able to join on the first day or week after the program launched get the most share of the "Free Money."
 2. **Sharing them to others.** Since there are only very few of these programs that truly provides earnings without recruiting, if you find one, capitalize on them by sharing them to others and let them do the same. The more you share this one-in-a-thousand business opportunity that you or will find, the more people you are able to help save their time and effort to find these types of programs, and the more you will be able to earn from referral bonuses!

After all, the most money on the internet money-making industry is made from real sales. Without sales, there will be no commissions or earnings for members or affiliates! If you contribute to these sales by referring people to pay for something, then you will make more money. When you share and refer others, you will be able to control your earnings and write your own paycheck. Your earnings will depend on your performance! The more you share what you have with, the more people will be able to see what you have to offer, and the more people that will go with you, get what you've gotten and do what you're doing. The more people that join, buy, and upgrade because of your sharing or referring efforts, the more money that you will earn – the bigger paycheck that you will write for yourself!

3. **Using the Products.** While there are only a very few programs that truly delivers their words, there are again much fewer programs or companies that truly have “real” products that accompanies the “great” business opportunity that they are presenting. When I say “real,” I mean “value-for-money” products and/or services that every member gets out of their “joining fee” or monthly subscriptions if it is a subscription-based program. Please note that Legal programs are NOT just about “Reward” Plan or “Compensation Plan” – it’s also about the products and/or services that they have to offer. There’s no Legal Business Opportunity without a product or service to sell or promote to others.

If you want to save time searching business opportunities and programs that truly deliver their promises of “earnings without recruiting” or “earnings by just joining,” check out the section IV (Annex) of this report for my recommendations.

D. Most of the so-called “Work-At-Home-Jobs” are overly-hyped up.

Data Entry Jobs, Data Entry Business, Email Processing Jobs (and whatever you may call it), that offers seems-to-be-easy ways of making money from home by just entering data online or processing emails are mostly “crap.” I’ve know very, very few of this that are for real and really have this types of jobs to offer; however, even them can’t hardly deliver the promises and the expectations that they have instilled on their visitors or members on their sales pages. Earning \$500 to \$1000 or more doing these types of jobs maybe possible, but it is more likely-closest to impossibility as it all depends on the total available number of jobs or the responses to the online data or ads that you are ask to type or submit to websites. If you want to venture on these types of programs, I can’t and will not stop you. I am only telling you here what most of these are all about. Just be cautions enough and be responsible of your own actions. Who knows, you might hit the “jackpot” and found a real data entry job or email processing job that truly pays you big for months and months to come?

- E. **Internet’s High Yield Investment Programs or HYIPs remain too good to be true** – they are designed to collapse in just a few weeks or months - specially those programs that offers at least 120% (20% Net) returns of your spent money or investment in less than 3 months time. Most of the owners will deliver their promised investment returns on the first few days or weeks or months of operation, but then runs away with bigger amount of cash that flows in as they start getting trust from existing members who’ve received payments from their system. In fairness to a very few HYIP owners, some of the owners are very good and honest; however, even how good or honest they are, HYIPs are still bound to collapse when the government authorities comes into play. They consider

HYIPs as a ponzi-scheme and a BIG scam. They will close it and all the investors money will hardly or never be given back to each investors.

My Recommendation:

If you really want to “Earn Money Out of your Money” or making money work for you from the comfort of your home, stay away from these HYIPs which are mostly Paid-To-Surf programs. Instead, try venturing on Forex Trading Robots. Some of these robots are good enough to double your money in a year. That may not be “BIG” enough if you will look at it in short term; however, from the investors’ point of view, a 100% investment growth in a year is a very good investment, and most especially if it last for a longer period of time.

For example, if you trade \$1000 in Forex and constantly double it every year with the help of a Forex Trading Robot or Software, then you will be having \$2000 after your first year. If you continue trading your \$2000 for another year, it will become \$4000 after your second year.

- ... \$8000 after your 3rd year
- ...\$16000 after your 4th year
- ...\$32000 after your 5th year
- ...\$64000 after your 6th year
- ...\$128000 after your 7th year
- ...\$256000 after your 8th year
- ...\$512000 after your 9th year
- ...\$1024000 after your 10th year

That’s \$1000 to over a million dollars in just 10 years! For me, that’s not bad. If you start with just \$500, you will have over a million dollars in just 11 years!

Do more maths yourself and imagine that you just have a robot that will help you to constantly double your Forex trading amount at least every year and you will be amazed with the “possibilities.” I say “possibilities” because I want to make it clear that these are not “guaranteed” results. However, I know these forex trading robots for more than 5 years now. And, to date, I can only recommend one that’s delivering the best performance of all the trading robots that I know of so far.

- ✓ This robot delivers what it says on their sales pages because most of their sales pages earning examples are from “live trading, real money accounts” – not just demo accounts.
- ✓ This robot uses this same strategy that has been used by the group of expert forex traders that keeps on doubling their money **every month** since 1999.

Please Note: doubling their money NOT just every year, but every month since 1999.

- ✓ The performance of this robot, based on the results of the initial tests made by the programmers and the unsolicited feedbacks from hundreds of customers that have bought and used this robot, shows that it had “so far” perfected the same strategy outlined above. ***It keeps doubling real-money trading accounts in just few months*** or even in just a single month. And since it is computer software or a robot, it does all the trading for you automatically - it earns you money in autopilot!

Even if you don't have prior experience in Forex Trading, this robot will still work for you. In fact, this robot is designed for those who are not experts in Forex Trading or don't have knowledge in Forex Trading to earn like a pro!

Due to the sensitivity and effectiveness of this robot, this will only be given away to a certain number of “masters” or owners. They will take this out on the internet anytime soon. So, if you are interested in making money from home by just letting your money work for you, get this money robot as fast as you can.

IV. ANNEX

- A. As I've mentioned on Article III, Section C above, there are only very few programs that are living and delivering by their words and promises of “earnings without recruiting” or “earnings by just joining.” And, of all those very few ones, I have only been able to choose two that I think to be the best amongst all of them. Best because they have a real and working system that helps them easily realize their promises. And that they have real products and/or services that truly give “value-for-money” for every member's subscription fee. With them having all these great qualities and with the fact that these two have been founded by owners who are already making good systems that lasts on the internet for more than 8 years now, I am sure that they are real businesses and are great opportunities to work with and recommend to others.

You can find more details about these two programs by clicking the link below:

⇒ **My Two Best Programs Details, Visit this link:**
<http://thebiggestlies.info/recommends>

- B. Also, I've talked about joining these types of program on their earliest stage. For you to be able to do so, you will need to know these great programs before they even launch to the public. You can learn about the internet best programs, business opportunities, products and/or services even before they launches to the public from <http://theBIGGESTLaunches.com>.

V. FINAL WORDS

If you really want to make money on the internet – there are a lot ways. But then again, I will tell you, there's no shortcut to success. However, if you can avoid getting into non-worthy programs... if you can avoid believing and living into deceptions of overly-hyped and nice-to-hear sales pitches or sales pages promises... if you will put in your heart that making money on the internet is NOT that easy but you are still willing to face and overcome every challenges that you may encounter along the way and never give up, then you have good chances of succeeding in your venture on the internet money-making world.

The Internet Money-Making Industry's biggest and common lies that I have collected and exposed above should guide you in your decisions as you start or continue your journey to your own success in the Internet Money-Making Industry. And, if you don't know where to start or where go next, you may want to consider some of my recommendations that accompany some of the sections above. Again, be responsible with your own actions – it is when you start taking responsibility that you will start gaining more power and more success.
